MOHIT PANDEY

245 Academy Lane, Manahawkin, NJ, 08050 | 848-237-9939 | pandey.mohitk@gmail.com | LinkedIn | Google Scholar

SUMMARY

- Interdisciplinary researcher with skills and experience in machine learning, radiomics, social media text analytics, and natural language processing.
- Worked on and led collaborative projects, resulting in peer-reviewed publications in high impact journals.
- Abreast of state of the art Natural Language Processing algorithms and tools and experienced in applied machine learning.
- Self-motivated, problem-solving and collaborative worker with excellent communication skills.
- Looking to research further on multimodal learning involving computer vision and natural language to help advance machine learning in healthcare.

EDUCATION

- M.S., Computer Science, Rutgers University, 2017 — 3.65/4.0
  Courses: Algorithms • Computer Animations and Game Design • Artificial Intelligence •Computer Vision • Machine Learning • Pattern Recognition • Probability Theory • Mathematical theories for Optimization • Text Mining in Big Data
- B. Eng., Electronics and Telecommunication, Shri G.S. Institute of Tech and Science, 2015 — 7.26/10.0 (absolute)
  Thesis: Cost effective solutions for Human Computer Interfacing

EXPERIENCE

Ipsos Public Affairs — **New York**
Senior Machine Learning Scientist — *July 2019 to July 2020*
- Created and streamlined deep learning based NLP solutions for Aspect based Sentiment Analysis towards top political entities spanning multiple countries for deeper understanding of electoral standings through social media data.
- Developed English and Arabic emotion analysis model for text in large scale social media stream using transfer learning.
- Productionized several real-time machine learning solutions through cloud based deployment.
- Worked on semantic segmentation to distinguish buildings footprint in geospatial imagery.

Weill Cornell Medicine — **New York**
Machine Learning Scientist and Cognitive Developer — *Feb 2017 to June 2019*
- Designed deep learning based NLP solution for information retrieval from unstructured Electronic Health Records to create large scale datasets for effectively carrying out outcomes research. A large patient pool hence created showed excellent MACE forecast.
- Worked on context aware neural data augmentation policy for low resource task in specialized domains like medical sciences.
- Co-Authored several machine learning papers for prognostic assessment and prediction of congestive heart failure in top-tier journals and conferences.
- Deployed and studied various state of the art deep learning models and techniques for challenging problem of LV Segmentation across multi-modality radiological imaging.

Cariclub Inc. — **New York**
Software Developer, AI — *June 2016 to June 2019*
- Designed matching algorithm to suggest most suitable match of non-profits for the users on CariClub platform using supervised machine learning. Also made location based, interest based recommendations using both content and collaborative filtering.
- Deployed distributed collabrative filtering using Alternating Least Sqaures using Apache Spark on AWS.

TEACHING AND MENTORING EXPERIENCE

- 2018 - Mentored 6 high-school interns in Cardiovascular anatomical annotations and basics of medical image segmentation.
- 2016 - Graduate Grading Assistant for Computer Animations and Game Design

RESEARCH PROJECTS

Computer Vision and Deep learning pipeline for Self Driving Car

- Used Convolutional Neural Network to detect and identify traffic signals
- Using state of the art computer vision models like LeNet and AlexNet, trained models to drive a car on simulator. The data was collected using human behavior cloning.
- Found lane lines to constrain car's driving using deep learning and traditional computer vision algorithms like Hough Transform.

Predicting a Terrorist Attack

- Implemented and compared various classification algorithms on Global Terrorism Dataset to predict the group responsible for a terrorist attack. Achieved accuracy of over 70% when using Random Forests for classification. K-Nearest Neighbor, Naive Bayes were other classifiers used.
- Performed linear and polynomial (2nd order) regression to predict number of casualties and wounded people in a given terrorist attack.

Probabilistic Topic Modelling

- Used Latent Dirchlet Allocation and Hierarchical latent Dirichlet allocation to cluster news articles in 20 NewsGroup Dataset.
- Did topic modeling to study and understand underlying pattern in essays of students applying to Rutgers Grad School.

Effect of Word Embeddings on Sentiment Analysis using Spark

- Used Apache Spark to pre-process Amazon book reviews and calculate word frequency correlation to labels.
- Presented a survey on various word embeddings on classical machine learning models as well as deep learning based neural network architecture.

Web Scale Recommendation System

- Implemented Distributed Stochastic Gradient Descent in Apache Spark for low rank decomposition of similarity matrix for collaborative filtering on Netflix dataset.

Low Cost Gesture Based Mouse

- Developed Java Desktop Application to access mouse based on user's gesture. The Application does not expect the user to wear additional hardware in order to detect fingers. The application detects 9 static gestures including opened and closed palm, claw, OK and O signs, Gun Sign, Pinch, Pointing and Finger Tap and supports common mouse actions like Pinch to Zoom, Scroll, Swipe, Wave, Finger push to click.

TECHNICAL SKILLS

- **Programming Languages:** Python, Matlab, MySQL, LaTeX, Java, Shell, JavaScript (familiar), R (beginner)
- **Software:** Photoshop, Illustrator, OsiriX
- **Operating System:** MacOS, Windows, Linux
- **Spoken Languages:** English: professional proficiency, Hindi: native

SCHOLARSHIPS AND AWARDS

- Computer Science MS Program Award, Indiana University, 2015 *[declined]*
- Tuition Assistance Award for Technical Studies, HEG India, 2011-2015
- Voted among best 5 grad level algorithm class project for "Feature representation of Amazon Book Recommendation System", USA 2015
- Winner Vijana Bharti State level technical poster presentation beating over 60 colleges, India 2012
- All India Rank 1887 in National Aptitude Test by NIIT, India, 2013 (Top 1 percentile.)
